DIABETES ■ ENERGY ■ PAIN ■ WEIGHT LOSS

Being a diabetic for over 30 years, I was concerned when I thought my insurance wouldn't cover my medications which totaled over \$7,500. So in October of 2010, I thought I'd give Healthy Chocolate a three month trial.

I eliminated half of my meds and saved over \$6,000 last year. PTL! No more injections! I also have been able to donate blood the last two years, which I hadn't been able to do the previous 20 years. I'm not plagued with pain anymore, so I'm able to help people with hours of yard work and other volunteering.

Approaching 60, I feel better than I have in years and enjoy playing tennis, pickle ball, kayaking and gardening. How wonderful that God created chocolate with antioxidants to help our bodies get healthier and feel younger.

I've noticed quicker healing, had only one cold (when I ran out of the anti-aging capsules), no flu, no aspirin for headaches or pain, had more energy, lower blood sugars, improved eyesight, 30 pound weight loss, more clarity and a sense of well being. I've also been able to share this antioxidant super food with others and improve their health while being able to take tax benefits to offset our income.

***"The amount of antioxidants that you maintain in your body is directly proportional to how long and healthy you will live."***
