### ESOPHAGUS

I have had many wonderful health results in the five years of eating healthy chocolate. But, the amazing results with my eroded esophagus have been a miracle!

Seven years ago, I was diagnosed with a severely eroded esophagus, the kind that can lead to cancer. My doctor put me on medication and said I would be on it the rest of my life. He also stretched my esophagus on two different occasions.

After eating healthy chocolate and keeping my doctor informed on what I was doing, he was pleased with the result. I have not been on any medication for my esophagus for nearly three years and continue to do very well.
